

As a subscriber to XM radio I am opposed to 04-160. I believe that since XM Radio is based on subscriptions, they should be able to offer what I am willing to pay for including weather updates and traffic news. I particularly use the traffic when I travel. With XM I no longer have to sift through station after station to get instant traffic updates. That is very valuable to me. But the main thing is that I am paying a subscription fee to get information including weather and traffic updates that I cannot get via broadcast stations (I can, but I have to wait for the 5:30 traffice report or something similar... not very convenient to me when I am traveling at 5:10 as an example).

Thanks for listening!

Dan
